

# ERALP ÖZCAN

Senior Frontend Developer · Full Stack

Istanbul, Turkey · [eralpozcan@gmail.com](mailto:eralpozcan@gmail.com)  
[eralpozcan.dev](http://eralpozcan.dev) · [github.com/Eralpozcan](https://github.com/Eralpozcan) · [linkedin.com/in/eralpozcan](https://linkedin.com/in/eralpozcan)

## SUMMARY

Senior Frontend Developer specializing in Vue/Nuxt, with full-stack depth in Node.js (Fastify) and PostgreSQL. 5 years shipping production features in agile teams, with hands-on ownership of architecture, SEO, and performance optimization. Creator of independent open-source products — built, deployed, and operated end-to-end. Recently extending into mobile with React Native. Comfortable across the stack, sharpest on the frontend.

## EXPERIENCE

### Tatil Dükkanı — Senior Frontend Developer

06/2024 – 05/2026

*Istanbul, Turkey*

- Developed the Tatil Dükkanı travel booking platform on Vue.js / Nuxt 2 with server-side rendering, focusing on component architecture, dynamic page management, SEO, and performance optimization.
- Redesigned the La Terrazza Cyprus hotel website and rebuilt its frontend from scratch with Nuxt 4 ([laterrazzacyprus.com](https://laterrazzacyprus.com)).
- Maintained the legacy Passenger Travel system (AngularJS): delivered UI improvements, service integrations, and performance-focused refactoring.
- Developed expertise in marketing and analytics tooling — implemented Google Tag Manager and Insider, including event tracking and campaign integrations.

### Protel (Simpra) — Frontend Developer

11/2022 – 06/2024

*Istanbul, Turkey*

- Developed features for Simpra Inventory, POS, KDS, and QR Menu — inventory tracking, cost management, and point-of-sale products — with Vue.js and Electron (web + desktop).
- Migrated the product codebase from Vue 2 to Vue 3.
- Worked in an agile (Scrum) team; wrote and improved unit tests as part of the development workflow.
- Used industry-standard tooling: Jira, Swagger, Git/GitHub/GitLab, Postman, ESLint, and SonarQube; implemented UI from Figma designs.
- Built a proof-of-concept desktop app with Rust and Tauri.

### Arma Group Holding — Full Stack Developer

08/2022 – 10/2022

*Gebze, Kocaeli, Turkey*

- Developed features for the Ads-Advertise and Drive platforms with Vue 3 and Node.js (Fastify).
- Built data layers with Sequelize ORM and PostgreSQL.

### Tebex — Freelance Software Developer

08/2021 – 01/2024

*Remote*

- Delivered web projects with HTML, CSS, JavaScript, and Vue.
- Developed gaming-platform features with Lua and SQL.
- Performed data analysis and visualization for client projects.

## OPEN SOURCE & INDEPENDENT PROJECTS

### Storeshots — Creator

Live · Open source

- Free, open-source App Store & Google Play screenshot generator built with Nuxt ([storeshots.org](https://storeshots.org)). Integrates AI vision models (Claude, OpenRouter) for context-aware headlines, brand-palette extraction, and conversion-focused slide ordering; exports pixel-perfect PNGs at exact store resolutions, fully client-side.

### VisionSqueezer — Creator

Live · Open source

- Rust-based image-optimization middleware and MCP server that cuts LLM vision-token costs by up to 90% by aligning images to Claude/GPT/Gemini tile boundaries ([visionsqueezer.com](https://visionsqueezer.com)). Ships a CLI, Python bindings, and integrations for Claude Code, Cursor, and VS Code.

## SKILLS

---

**Frontend:** Vue.js, Nuxt.js, React.js, React Native, JavaScript / TypeScript, Tailwind CSS, Sass

**Backend:** Node.js, Fastify, Express, PostgreSQL, MongoDB, Redis, Drizzle, Prisma, Sequelize

**Tools & DevOps:** Docker, Traefik, Dokploy, n8n, Git, GitHub, GitLab, Jira, Figma, ESLint, SonarQube

**Legacy:** AngularJS (maintenance)

## COMMUNITY & ORGANIZATIONS

---

### Kodluyoruz — Master Assistant & Mentor

06/2021 – 09/2023

- Mentored bootcamp participants; assisted the Protein Full Stack Bootcamp (Vue.js) and the Gelecek Varlık Full Stack Bootcamp (React.js / .NET).

### Patika.dev — Bootcamp Acceleration Mentor

01/2022 – 12/2022

- Mentored participants through Patika.dev's bootcamp acceleration program.

### World Food Programme — Bootcamp Assistant

06/2022 – 09/2022

- Supported React.js and Flutter bootcamps run together with Kodluyoruz.

### Yapay Zekâ Araştırma İnisiyatifi — AI Researcher

07/2020 – 08/2023

- Contributed to an open-source academic R&D platform for AI technologies.

### Deep Learning Türkiye — Researcher

12/2017 – 06/2020

- Member of the Reinforcement Learning workgroup.

## EDUCATION

---

**Anadolu University** — B.A., Business Administration & Management

2017 – 2023

**Karabük University** — B.Sc., Mechatronics Engineering

2013 – 2019

## PUBLICATIONS

---

### ResistorNet-DirencNet — IDSEW'18

06/2018

- Resistance-data generation and classification using deep learning; led the research and development. Dataset published on Kaggle.
